

THERMOFORMED

ABS/TPU FOR INTERIOR VEHICLE TRIM

- **Premium soft-touch surface**
 - Pleasant and warm touch
 - Matte, textured and customized finishes
 - High perceived quality in visible parts
- **Functional multilayer material**
 - ABS base: rigidity, stability and excellent thermoformability
 - TPU layer: enhanced touch, surface flexibility and protection
- **Tailor-made design**
 - Customization of color, texture, thickness and geometry
 - Useful width up to 2000 mm
- **Interior applications**
 - Door panels, side panels, cabin trims, glove boxes, technical covers...
 - Buses, caravans and industrial vehicles
- **Ready-to-install solution**
 - Integration of inserts, reinforcements and fasteners
 - In-house cutting, machining and assembly operations
- **Sustainable approach** 
 - Durable thermoplastic solution
 - Recyclable according to the material configuration and customer requirements
